

## Industry 4.0 Awareness Seminars Reports

1.	Date of the Seminar	22/01/2020
2.	Organizers	CII
3.	Title of the seminar	Awareness Workshop on Industry 4.0 - Mangalore The Indian Perspective
4.	Programme	Annexure 1
5.	Report: suggested contents (1) Main takeaway / good suggestions (2) Clusters covered - <b>Mangalore</b> (3) Nos attended - <b>41</b> (4) Success stories that need to be compiled / shared <ul style="list-style-type: none"> <li>• <b>Industry 4.0 / IoT</b></li> <li>• <b>Smart Manufacturing /AI and IOT</b></li> </ul>	<b>( 1 ) Main takeaways / good suggestions</b> <ul style="list-style-type: none"> <li>• Majority of the deficiency in Industry is because of inability to find the inefficiency at places because of lack of data, Industry 4.0 can be helpful at these places.</li> <li>• If we could have similar talks at the incubation centers like K-Tech etc would be nice since there are small scales industry growing up from these centers it would be helpful to them</li> <li>• Understanding between industry 3.0 and 4.0</li> <li>• Practical Demonstrations</li> </ul>
6.	List of Speakers with contact details	Annexure 2
7.	Photographs	Annexure 3
8.	Resource persons for providing consultancy, skilling, guidance etc.	<ul style="list-style-type: none"> <li>• <b>Mr. Narayanswamy M K</b> Founder &amp; CEO METI M2M India Pvt. Ltd.</li> <li>• <b>Mr. Raghav Shetty</b> CEO Research Design Lab Technologies Pvt. Ltd.</li> </ul>
9.	Presentations	Annexure 4

10.	Learnings from the seminar	<ul style="list-style-type: none"><li>• Time Management of the speaker</li><li>• Working models and demonstrations of Industry 4.0 Applications were very well received by the participants. It was also quite engaging and insightful.</li><li>• Participants attending requested for some takeaway's brochure or material with the gist of what's presented.</li></ul>

**Programme**

**Awareness Programme on**

**Smart Manufacturing and Industry 4.0 - The Indian Perspective**

**22<sup>nd</sup> January 2020, 1000 – 1300 Hrs, KSIA Association, Baikampady, Mangalore**

**Programme**

<b>0930 – 1000 Hrs</b>	<b>Registration and Participants assemblies.</b>	
<b>1000 – 1015 Hrs</b>	<b>Welcome Remarks</b>	<b>Mr Ajith Kamath</b> Propeitor Ajith Enterprises
<b>1015 – 1030 Hrs</b>	<b>Theme Setting</b>	<b>Mr. K Prakash Kalbavi</b> Kalbavi Cashews
<b>1030 – 1130 Hrs</b>	<b>Industry 4.0 / IoT</b>	<b>Mr. Narayanswamy M K</b> Founder & CEO METI M2M India Pvt. Ltd.
<b>1130 – 1200 Hrs</b>	<b>Smart Manufacturing /AI and IOT</b>	<b>Mr. Raghav Shetty</b> CEO Research Design Lab Technologies Pvt. Ltd.
<b>1200 – 1225 Hrs</b>	<b>Q&amp;A</b>	
<b>1225 – 1230 Hrs</b>	<b>Closing Remarks</b>	<b>Mr. Henry Britto</b> Propeitor Toyeez
<b>1230 Hrs</b>	<b>Lunch &amp; Close</b>	

**Annexure 2**

**List of speakers**

<b>S No</b>	<b>Name</b>	<b>Designation</b>	<b>Organization</b>	<b>Email</b>
1	Mr. Ajith Kamath	Propeitor	Ajith Engineering	ajithkamath@yahoo.com
2	Mr. Henry Britto	Propreitor	Toyeez	toyeez@dataone.in

**Presentations**

# Industry 4.0 – The journey

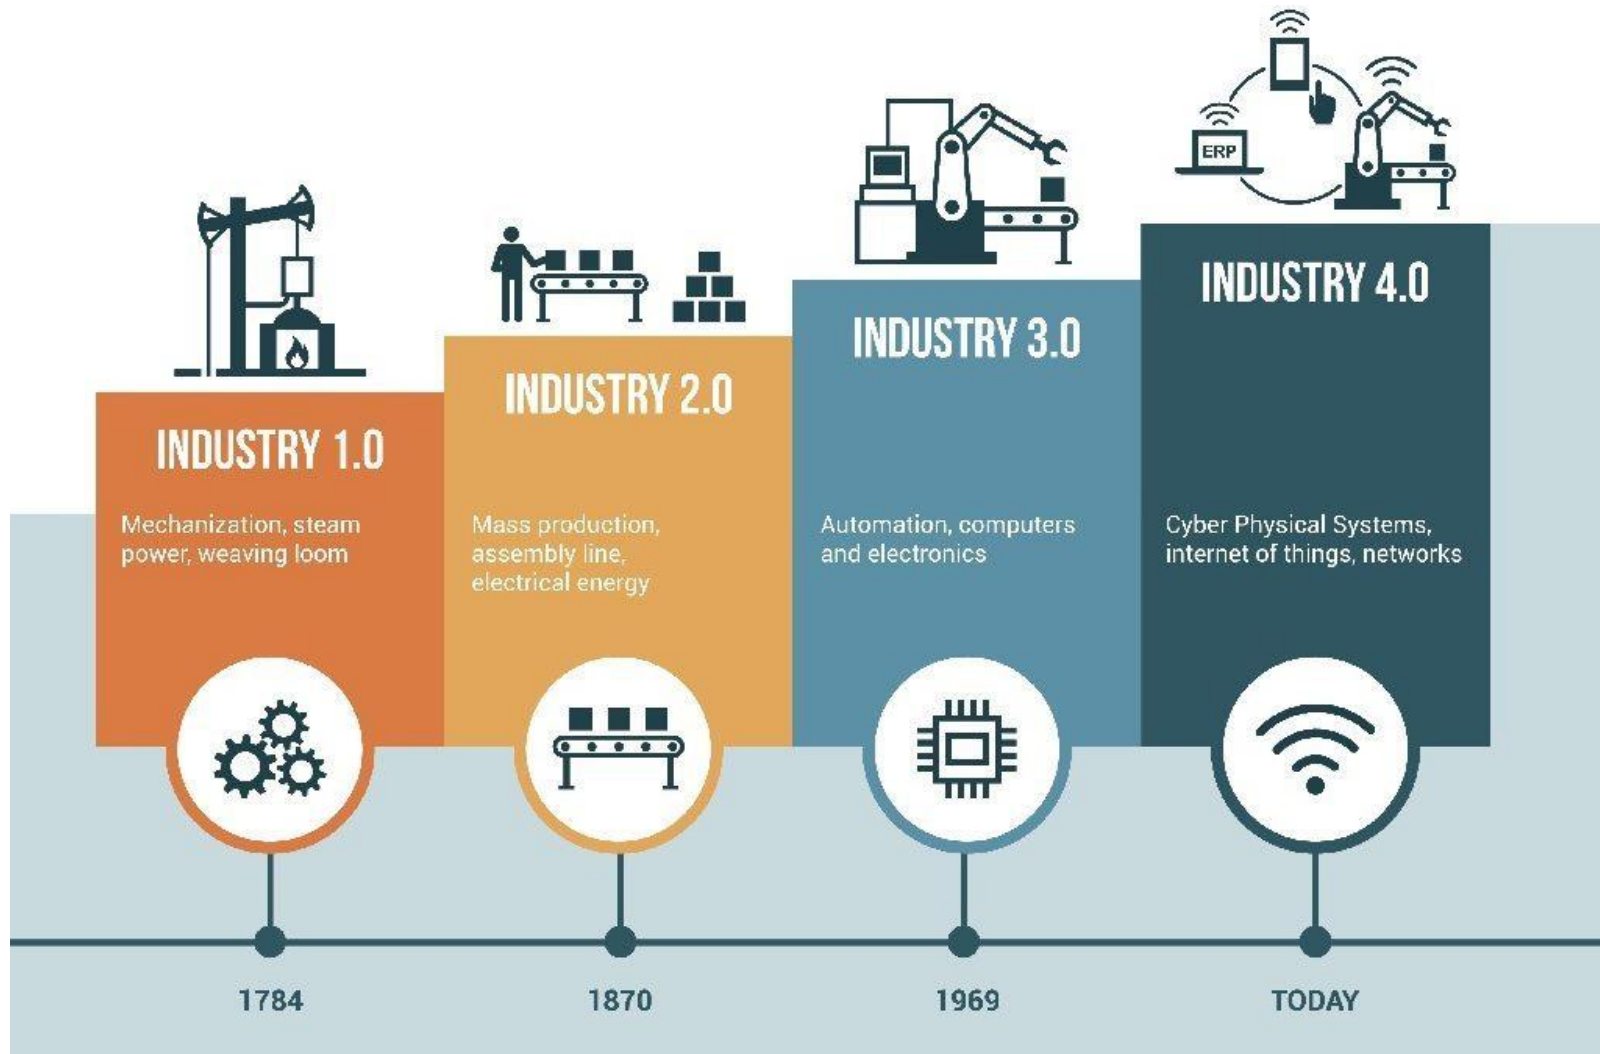

M K Narayana Swamy

# Agenda

- ▲ Industrial revolution
- ▲ What is Industry 4.0?
- ▲ The journey – so far
- ▲ Implementation challenges
- ▲ References & Credits

# The Industrial revolution

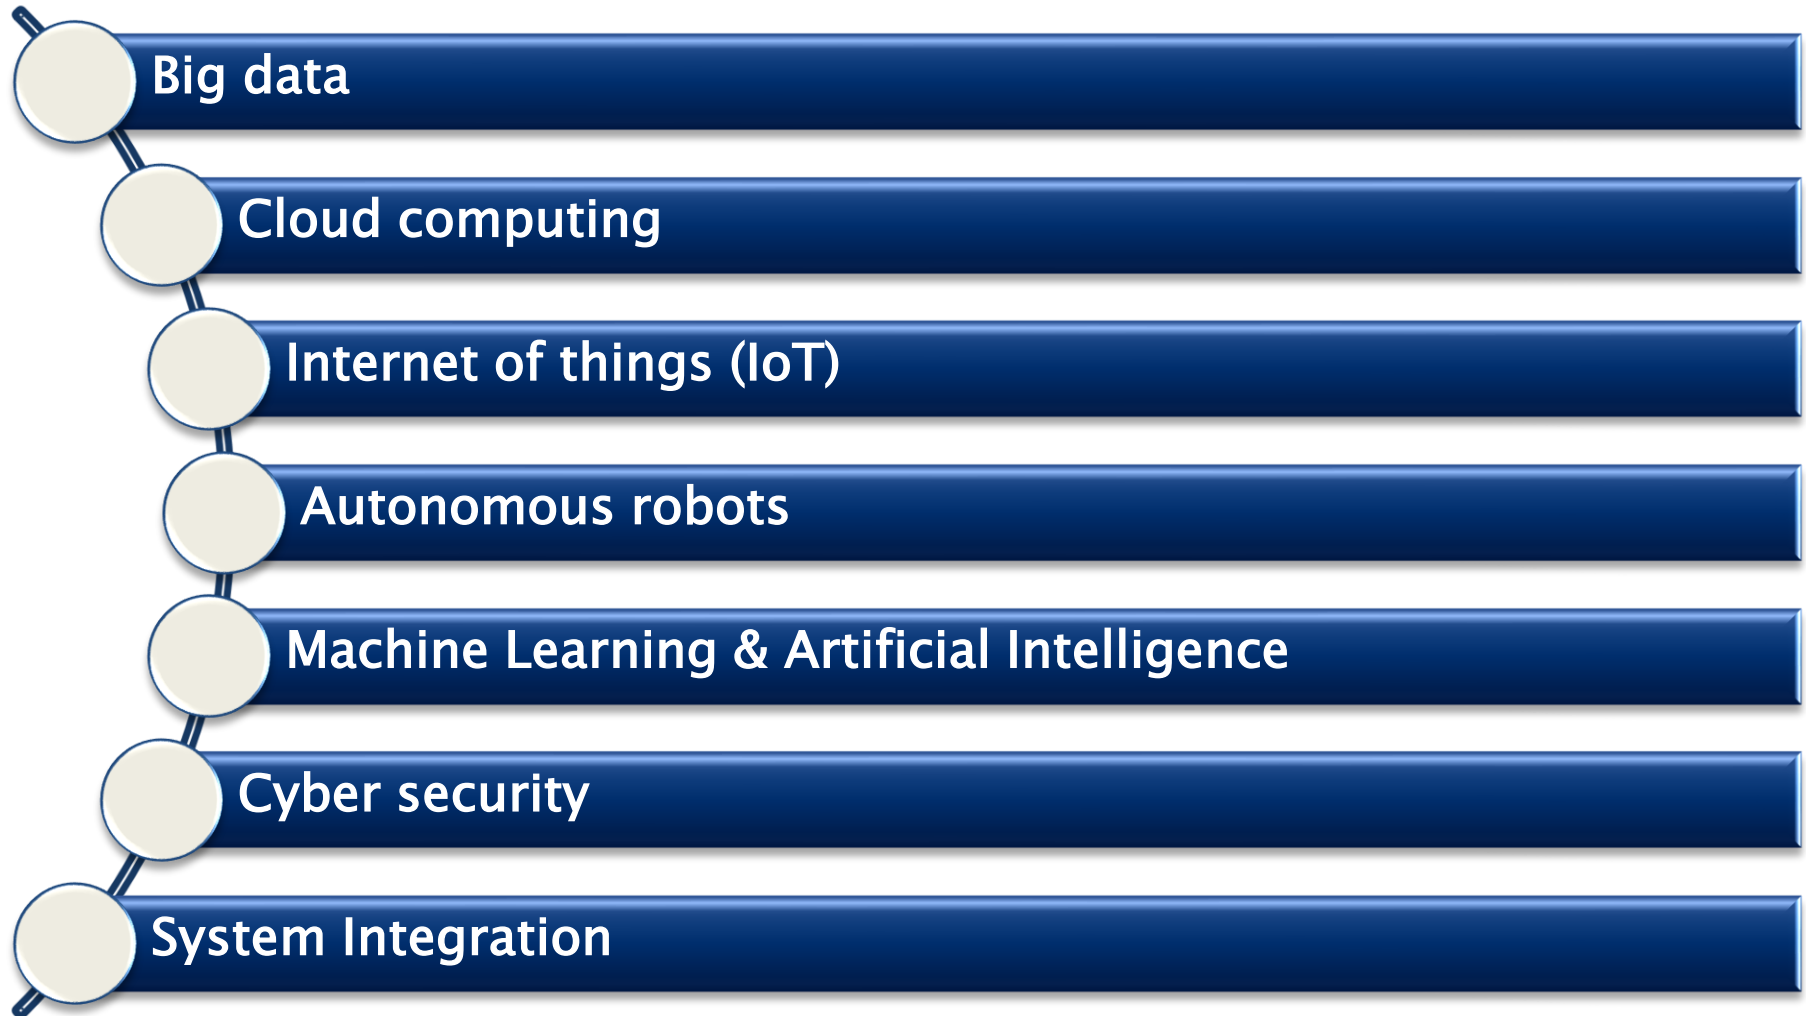

# Industry 4.0 ?

- ▲ Capture data from machines
- ▲ Convey insights to operators
- ▲ Make quicker and smarter decisions
- ▲ Minimize costs
- ▲ Optimize supply chains, factories and distribution
- ▲ Integrate, Improve and evolve.

# Key components of Industry 4.0

# Readiness: Industry 4.0

Smart  
factory

Smart  
products

Employees

Strategy and  
organisation

Smart  
operations

Data-driven  
services

- Digital modelling
- Equipment infrastructure
- Data usage
- IT systems

- Communication add-on functionalities
- Data analytics in usage phase

- Skill acquisition
- Employee skill sets

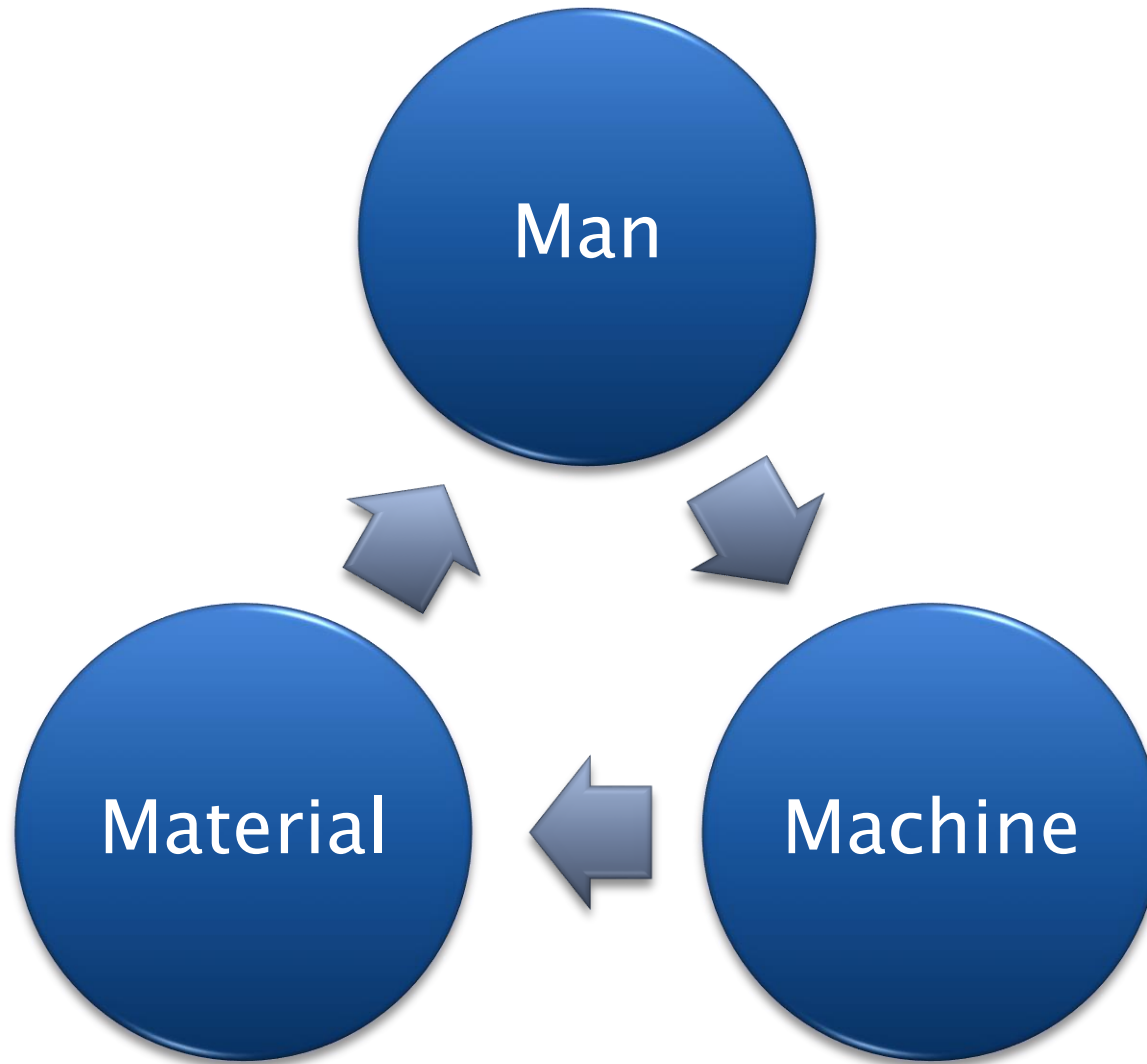

- Strategy
- Investments
- Innovation Management

- Cloud usage
- IT security
- Autonomous processes
- Information sharing

- Data-driven services
- Share of revenue

Note: The parameters/categories may vary based on type of industry

# What gets connected?

## Machine

- Total production?
- Is data reliable?
- Good/bad parts? (Quality)
- Up-time (Availability)?
- Target Vs Production
- OEE (Overall Equipment Efficiency)?
- Down-time?
  - Reason?
  - Reason repeating?
- Energy cost of production per component?
- Process parameters (temp/pressure etc.,) maintained?
- And more...

## Material

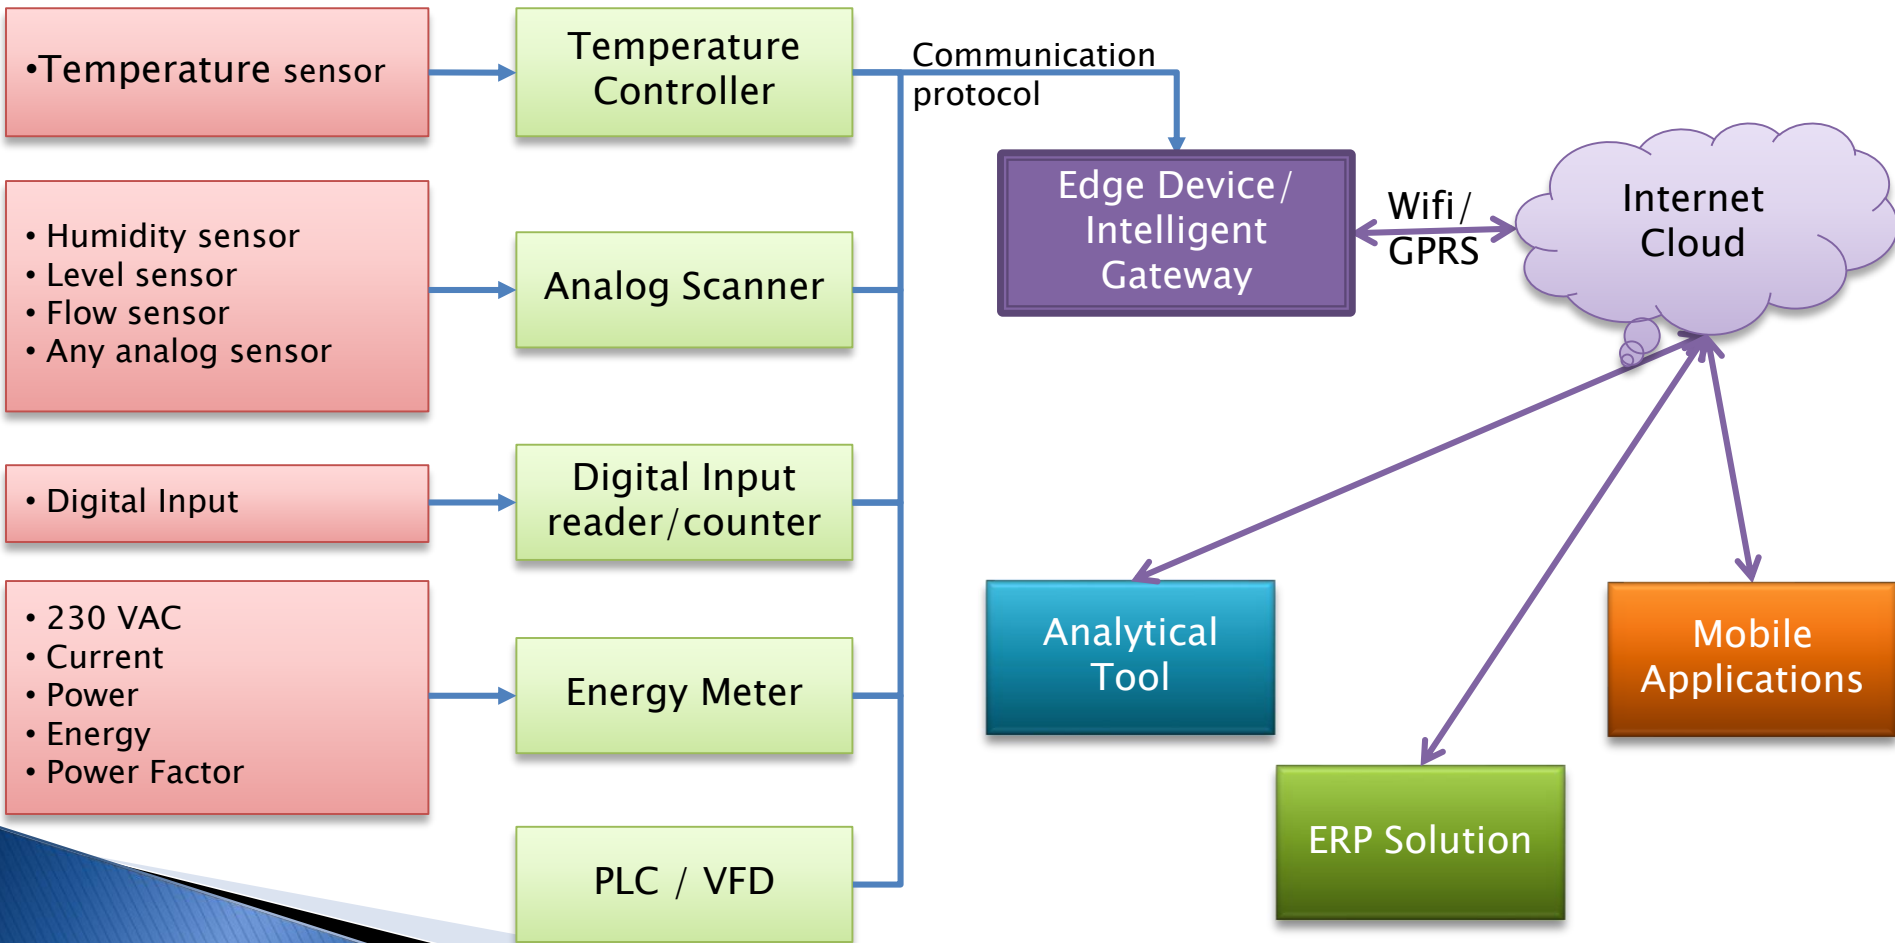

- Raw material Supplier?
- Batch?
- End product Traceability?

## Man

- Machine operator?
- Shift In-charge?
- Efficiency?

# Sensor to Analytics – Data flow

## Implementation challenges

# Implementation challenges

- ▲ New business models—the definition of a new strategy?
- ▲ Rethinking your organization and processes to maximize new outcomes
- ▲ Conducting successful pilots and POCs
- ▲ Helping your team to understand where action is needed
- ▲ Change management
- ▲ The genuine interconnection of all departments and other existing productivity systems
- ▲ Recruiting and developing new talent

# Industry 4.0 – Technical challenges

- ▲ Which machines should I connect first?
- ▲ What communication protocol should be standardised across machines?
- ▲ What about legacy machines, can I get data from them?
- ▲ Will my machine OEM support with necessary details, what happens to warranty?
- ▲ What speed and how much data should I acquire?
- ▲ Should I go with a hardware/instrumentation company, software company or analytics company for implementing?
- ▲ Wired or wireless? Wifi/GPRS/Ethernet?
- ▲ Should I go for local server or cloud?
- ▲ What happens to data safety and security if I go to cloud?
- ▲ Do I have the infrastructure and bandwidth of IT team to manage this huge amount of data
- ▲ How to design dashboards, that not only gives the real-time/historical data but also gives insights and actionable items?
- ▲ How to Integrate with existing software systems like ERP/MES etc.,

# Sensors to Analytics

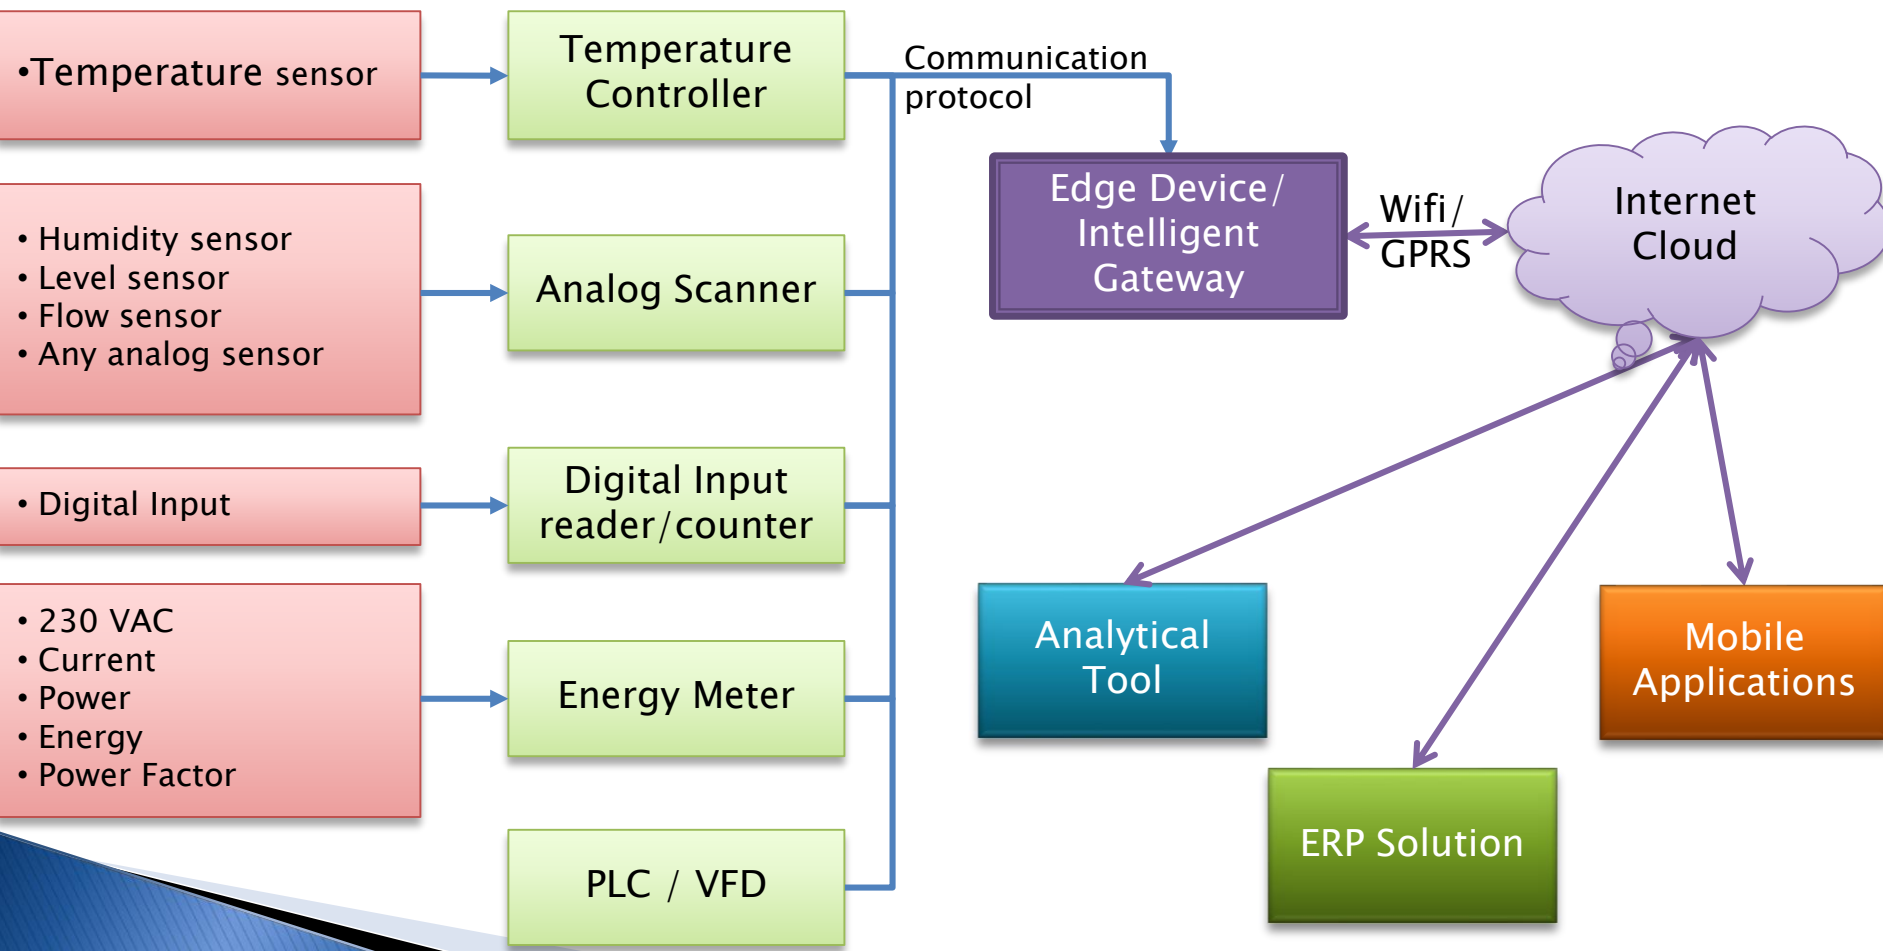

M K Narayana Swamy  
September 20, 2018

# Agenda

- ▲ Sensors
- ▲ Hardware
- ▲ Software
- ▲ Data

# Sensor to Analytics – Data flow

# Analytics

# Sensor?

- ▲ A device\* to detect events or changes in its environment and send the information to other electronics,

\* (device, module or a subsystem)

# Types of sensors

- Temperature Sensor
- Pressure Sensor
- Proximity Sensor
- Ultrasonic Sensor
- Humidity Sensor
- Accelerometer
- IR Sensor (Infrared Sensor)
- Smoke, Gas and Alcohol Sensor
- Touch Sensor
- Colour Sensor
- Flow Sensor
- Level Sensor
- And more...

# Proximity sensors

## ▲ Optical

- Infra-red, Laser, photocell-reflective

## ▲ Inductive

## ▲ Magnetic

## ▲ Ultrasonic

## ▲ Capacitive

## ▲ Radars

## ▲ Sonars

## ▲ Hall-effect

# Industrial Sensors Types and output

## Sensor Types

Analog

Digital

Counters

## Sensor Outputs

Current (4–20mA, 0–20mA, 0–5A)

Voltage (0–5V, 0–10V, 0–50mA)

Frequency/Pulses

Pulse-width variations

Capacitance

# Digitizers

Digitizers	Input type
Digital Temperature Controllers	Voltage/Current
On/Off Controllers	Voltage/Current
PID Controllers	Voltage/Current
4 Channel Scanners	Voltage/Current
8/16/24 Channel Scanners	Voltage/Current
Totalizers	Freq / Pulse
Digital Input Cards	Digital Input
Energy Meter	Voltage & Current

# IoT Gateways

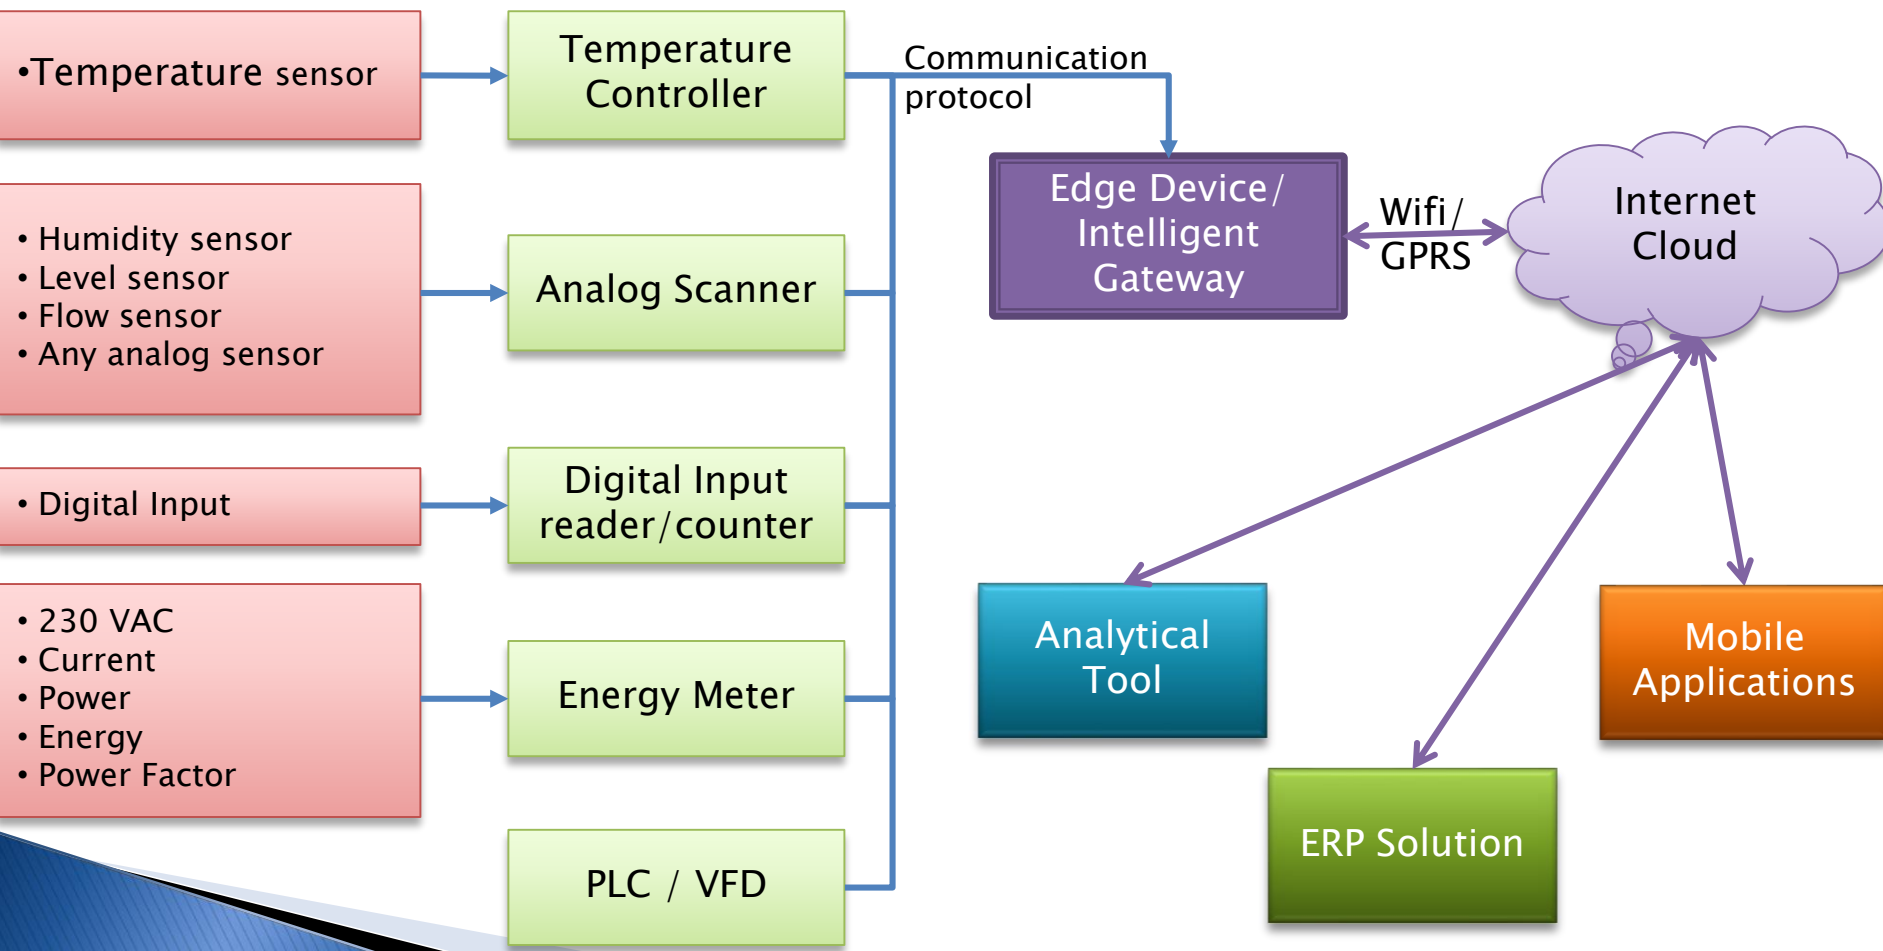

- ▲ Shared Cloud hosting
- ▲ Dedicated Public Cloud hosting
- ▲ Private cloud hosting
- ▲ Private Server (On-premise) Hosting

**All you need is an IP address**

- ▲ Data acquisition (Wired/wireless)
- ▲ Data transmission from Gateway to Server
- ▲ Secured Storage
- ▲ Retrieval consistency
- ▲ Analysed data transmission from Servers to end-users
  - Web-front end
  - Mobile Apps
- ▲ API exposure for integrating with other systems

# Sensor to Analytics – Data flow

**METI**

Embedding Engineering Excellence

**Ramachandra Shetty,  
BE**  
Project Manager<sup>4</sup>

# RDL PRODUCTS

## PORTFOLIO

**INDUSTRIAL DATALOGGER 4.0**

**CLOUD PLC 4.0**

**ACCESS CONTROL SYSTEM**

**INDINO 4.0**

**R-LiFi**

**UHF RFID Reader**

# RDL PRODUCTS PORTFOLIO

LiFi V2

Vehicle Tracking and Monitoring system -VTMS

Automated Machine Fault Alerting system

Long Range UHF RFID Reader

Datalogger 4G

Digital Checksheet

# RDL SHOP FLOOR AI 4.0

RDL Shop Floor AI 4.0 bundled with software and hardware deploying to the industry

- ✓ Process Effectiveness and vulnerabilities
- ✓ Impact of the individual step on the process
- ✓ Online records of audit items
- ✓ Data Analytics/ML enabling continuous evaluation
- ✓ Automatic triggers for escalations
- ✓ Predictive analytics and reducing down time
- ✓ Optimized resources utilization

# INDUSTRY OPERATIONS - CHALLENGES

**Accountability**

- Audit – Process and Plant
- Accurate issue reporting
- Timely and Authenticity in reporting

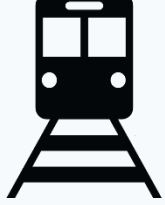

**Availability**

- Resources – Machine, Human
- Usage of consumables, tools,
- Preventive maintenance
- Warranty, guarantee management

**Resilience**

- Issue resolution time
- Alert right person at right time
- Predictive issue detection and resolution

**Industries**

							
Airport	Public Places	Hospitals & Health Care Centres	Railways	Defence	Banks	R&D	Oil & Gas

# DIGITAL CHECKSHEET— TARGET INDUSTRIES & APPLICATIONS

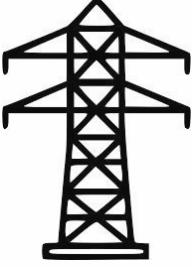

**PAPERLESS**

**In Going Paperless**

Paperless  
Offices ISO  
Process

**PERIODIC CHECKSHEET**

# 3 Year Summary of Evolvment in Customized Hardware & Software ,Design & Development

Board Level  
FY 2017-18

Product Level  
FY 2018-19

Industrial Panel System Design  
FY 2019-20

- Devices
- Dashboards

- ✓ Authorized Mobile
- ✓ Secure HMI

# **BUSINESS MODEL & STRATEGY**

## **Value Proposition:**

- Industry 4.0
- Optimization, Higher Utilization and Productivity
- Predictive performance and lack human error

## **Strategies**

- Sales – Push strategies
- Marketing – Pull strategies
- Social Media Marketing
- Exhibitions
- Other conventional way of promotions

# **REVENUE MODEL**

## **Revenue Model**

- Subscription / Contract period (3-6-12 months)
- AMC
- OEM & ODM services

## **Customers/Target Segment**

- Automotive
- Manufacturing
- Food & Beverages
- Aerospace
- Healthcare
- Logistics
- Retail
