

Ministry of Heavy Industries

Pre-bid conference organised by Ministry of Heavy Industries (MHI) for prospective bidders under 'Scheme to Promote Manufacturing of Sintered Rare Earth Permanent Magnet' receives positive industry response

MHI had earlier issued an RFP on CPP portal for Selection of Manufacturers for Establishing 6,000 MTPA of Integrated Sintered NdFeB Rare Earth Permanent Magnet Manufacturing Facilities under the Scheme with an outlay of ₹7,280 Crore

Bidding process to be held online through a transparent two cover system Technical Bid and Financial Bid under the Least Cost System (LCS) mechanism through CPP Portal

Tender documents are available on the CPP portal since 20th March 2026 and Bid due date is 28th May 2026

Posted On: 07 APR 2026 4:26PM by PIB Delhi

The pre-bid conference organised by the Ministry of Heavy Industries (MHI) for prospective bidders for the 'Scheme to Promote Manufacturing of Sintered Rare Earth Permanent Magnet' has received wide participation and interest from at least 25 companies attending the conference. The conference was organised by MHI today i.e. on 7th April 2026 at India Habitat Centre in New Delhi. Earlier MHI

released the Request for Proposal (RFP) on 20th March 2026, inviting bidders for setting up integrated Rare Earth Permanent Magnet (REPM) manufacturing facilities in India for a total manufacturing capacity of 6000 MTPA with a Scheme outlay of ₹7,280 Crore.

A detailed presentation was made to the prospective bidders covering the Scheme contours, major provisions of RFP and procedural aspects of the bidding process. During the pre-bid conference, the queries raised by the prospective bidders were addressed. The participants were informed that the last date to submit their queries by way of e-mail (as per details provided in RFP) is 22nd April 2026.

The participants were also informed that the bidding will be held online through a transparent two stage process, under the Least Cost System (LCS) mechanism through CPP Portal. The last date for submitting the bids is 28th May 2026.

Key features of the selection process include fulfilment of the eligibility criteria, submission of a Detailed Project Report (DPR) as per format provided in RFP and LCS based selection for technically qualified bidders. The Government will select maximum of 5 (five) entities through the bidding process, with each entity setting up facilities of up to 1,200 MTPA, aggregating to a total of up to a maximum capacity of 6,000 MTPA.

REPMs are one of the strongest types of permanent magnets and are vital for electric vehicles, renewable energy, electronics, aerospace, and defence applications. The Scheme will support the creation of integrated REPM manufacturing facilities, involving conversion of rare earth oxides to metals, metals to alloys, and alloys to finished REPMs.

This Scheme is expected to play a key role in strengthening domestic manufacturing capabilities, reducing import dependence, and supporting the development of a robust and globally competitive REPM ecosystem in India.
